LOWER PARK

Snoqualmie Falls Park is part of a larger hydroelectric generation facility owned and operated by Puget Sound Energy. Implementation of improvements to all park areas will be completed by the end of 2013. The park recently opened to the public and includes the new Lower Park area, a renovated trail, and a new historic museum district, and new viewpoints.

Plant 1 Historic District - two historic structures were restored for interpretation and education: the historic train depot and

carpenter shop. Situated adjacent to the railroad, a timber deck surrounds these restored structures, connecting them to a third new structure - a shelter for a large historic generator display.

Lower Park - new features include a parking lot with rain gardens for stormwater management, interpretive plaza with green-roof kiosk, restroom, boater put-in for rafters and kayakers, interpretive elements and signs, trails and walkways, boardwalk to the lower viewpoint, habitat restoration, and wetland creation.

Trail - the existing trail was realigned to make the user experience more enjoyable and to make it barrier free. Several new meanders were added to the trail to emphasize large features such as nurse logs and stumps, to minimize erosion, and to discourage desire paths that had developed.

Throughout the project interpretation was integrated and thousands of new plants were added to enhance the existing forest and forest edge plant communities.

Project:
 - Snoqualmie Falls Redevelopment Project
 - Upper Park/Falls Viewpoint
 - Lower Park
 - Plant 1 Historic Area
 - Trail

Location:
 Snoqualmie, WA

Client:
 Puget Sound Energy

Team:
 Fischer Bouma Partnership (Prime/Landscape Arch)
 Magnusson Klemencic Associates (Civil)
 BOLA Architecture + Planning (Architecture)
 Lehrman Cameron Studio (Interpretive)
 Seattle Structural (Structural)
 WSP Flack + Kurtz (Electrical)
 Barnard Construction Co. (General Contractor)
 Olm Construction Co. (Landscape Contractor)
 Pacific Studio I&E Fabrication

Completed:
 Upper Park Viewpoint - Summer 2012
 Trail - Fall 2013
 Lower Park - Fall 2013
 Plant 1 - Fall 2013
