

whoa...this bridge is singing!

Stories of sound and motion adorn the interior of the sky cabin.

ZOOM!!!
motion sensors illustrate movement in lights.

the slide transports the child into a new play garden, a distinct environment of sound and motion.

Wow! We're making the ball move on the wave...and it's playing a tune!

POW!
Story Waves animate the ground plane and weave stories throughout.

SiteWorkshop

ARTISTS

In collaboration with Seattle-based artist Trimpin, Site Workshop's submission for the Seattle Center Artists at Play competition creates a playscape that allows children to experience sound and motion in unexpected ways. Inhabiting a colorful landscape and integrated within dramatic play equipment, a variety of interactive, musical and kinetic sculptures capture the imagination, while cleverly engaging visitors in the principles of music and physics.
